## Skills

### Programming Languages

- C++
- C#
- Java
- Python
- PHP
- JavaScript
- TypeScript
- SQL

### Web Development

- HTML5
- CSS3
- Responsive Design

### Frameworks & Libraries

- React
- Node.js
- ASP.NET
- Laravel

### Databases

- MySQL
- SQLite

### Version Control & Collaboration

- Git
- GitHub
- GitLab
- Jira
- Agile/Scrum

### Tools & Others

- Visual Studio
- VS Code
- IntelliJ
- Docker

### Soft Skills

- Problem-Solving
- Teamwork
- Adaptability
- Communication

## Hobbies

- Football
- Workout
- Healthy lifestyle

## Language

English - B2

# Ádám Zsóri

## Software Developer

I graduated in the summer of 2024 and now I want to gain as much experience as possible, while I have also started my master's in Computer Science at ELTE, specializing in software technology.

For me, I get along well with people. I consider myself a good listener, and I am a born optimist. I try to look on the bright side of things.

## Experience

### 2023 - Present

#### Oracle Hungary

#### Software Engineer Intern

- During my first internship, I gained valuable insights into the structure and operations of a large corporation. One of the most rewarding aspects of this experience was working within a Scrum team, where I quickly grew to appreciate the collaborative and dynamic nature of agile development.
- My primary focus was on UI development, where I had the opportunity to work with a variety of modern technologies. These included Oracle Jet Toolkit/Preact, TypeScript, Webpack, Node.js, and SCSS. This hands-on experience allowed me to strengthen my front-end development skills and deepen my understanding of how these tools contribute to building efficient and user-friendly interfaces.

## Education

### 2024 - Present

#### Eötvös Lóránd University, Budapest

#### MSc in Computer Science

- Currently, I am interested in several things, such as software design and project management.

### 2021 - 2024

#### Eötvös Lóránd University, Budapest

#### BSc in Computer Science

- Throughout my studies, I have acquired a wide range of new skills and technologies. Some of the most impactful courses I completed include:
  - Web Programming:** This course introduced me to the basics of **JavaScript** and **PHP**. My curiosity and motivation to explore new technologies continue to drive me forward in this field.
  - Software Technologies:** In a team-based environment, we used **Git** and **Jira** to collaboratively develop a game in **C#**, refining my teamwork and project management skills.
- For my thesis, I developed a web application designed to support class communities in organizing learning activities. I utilized **Laravel** and **React** frameworks, motivated by my interest in integrating new technologies and exploring how different frameworks can work together efficiently.
